Start the demo

Recovery Progress / Demonstrator's guide

24 fictional households. 72 authored checkpoints. Four specialist views and one ranked next step. Use this guide to show why a result changes, what remains unknown, and what the prototype does with those facts.

Open the preview

```
python -m streamlit run app.py
```

1. Use the interpreter where requirements.txt is installed (for example .venv/bin/python). In the app navigation, open Recover > Recovery Progress · Preview.

2. Expand Choose story or saved case. Set Dashboard source to Synthetic stories. Choose Household story and Story checkpoint.

3. The checkpoint labels are 1 · Starting point (initial), 2 · An update (update), and 3 · Later in recovery (later). Select Refresh checks after each change.

4. Wait for Last run activity and the four specialist cards. Read One manageable next step, open relevant View details, then compare Your two recovery tracks.

Say this before showing results

All identities, addresses, prices, capacities, ratings, observations, provider responses and timing are fictional. Local deterministic checks run through LangGraph and the actual MCP stdio boundary. This demo does not reserve space, send enquiries, approve claims or dispatch work.

Reading the signals

Signal	Meaning
Red	Action needed for the named condition
Yellow	In progress
Green	Condition met for the named check
Unknown	Missing, stale or unavailable information
Not applicable	A separate status, not success or failure

Execution and condition are different. Complete + Red means the check ran and found a problem. Needs information or Couldn't update appears gray. Green does not certify home safety or insurer approval.

Choose a demo route

Five minutes: the main recovery story

Time	Presenter action	Point to make
0:00-1:00	Rivera / initial > Refresh checks	Show the source badge, four cards and primary action. Open housing details to compare rooms with spaces.
1:00-2:30	Rivera / update > Refresh checks	Read What changed and compare the Home & daily life and Costs & funding tracks.
2:30-4:00	Chen / later > Refresh checks	Repairs and return home do not establish reimbursement receipt. Inspect preparation, funding and payment separately.
4:00-5:00	Open Timing & assumptions	Illustrative story ranges are not forecasts. End with the next action and the evidence behind it.

Fifteen minutes: dependencies and uncertainty

1. Minutes 0-5: follow the five-minute route. Use the scenario pages to read exact card states and action text.

2. Minutes 5-8: Alvarez initial > update > later. Compare exact stage cost, explicit allocation and the remaining gap with provider quotes and work commitments.

3. Minutes 8-10: Baptiste initial > update. Show accessibility, household suitability, pets, transport and availability as separate housing constraints.

4. Minutes 10-12: Morgan initial > later. Insurance can be not applicable while household funding still needs information. Completed repairs remain distinct from funding certainty.

5. Minutes 12-14: Campbell initial > update > later. Read Couldn't update / No new observation at update and the partial recommendation from the remaining checks. Show the fresh utility result at later.

6. Minutes 14-15: Williams initial. Refresh checks is disabled until immediate safety is explicitly assessed; missing facts are not filled from another household.

Technical route: fifteen additional minutes

1. List the five MCP tools and invoke the compact scenario payload examples on the next page.

2. Compare assess_insurance_readiness and assess_funding_gap for the same checkpoint: both expose the same shared preparation/funding result.

3. Inspect source_mode, context_key and input_fingerprint. Explain how context changes make earlier snapshots historical.

4. Record a simulated provider update, refresh, then switch checkpoints to show the override is scoped to one story checkpoint.

5. Use the fixture and metadata files in the catalog reference to trace a displayed condition to exact source facts.

For a rehearsed baseline, use a fresh demo-only progress database path at launch. Do not clear the existing progress database or the accepted recovery-case database.

Demonstrate the five MCP tools

Run the server from this repository with the installed interpreter. It uses local stdio; no API key or external provider integration is required.

```
.venv/bin/python -m recovery.progress.mcp_server
```

In a compatible MCP host, configure the interpreter as command, [-m, recovery.progress.mcp_server] as args, and the repository as cwd (or set PYTHONPATH to its absolute path). Call each tool using the arguments below.

find_temporary_housing

```
{"scenario_id": "baptiste", "checkpoint_id": "initial"}
```

Compare needs, room/space units, budget and suitability; no booking.

check_utility_health

```
{"scenario_id": "rivera", "checkpoint_id": "initial"}
```

Read address scope, observation age, electricity, water supply, potability and gas applicability.

assess_insurance_readiness

```
{"scenario_id": "chen", "checkpoint_id": "later"}
```

Inspect preparation, stage funding and decision/receipt as separate result items.

assess_funding_gap

```
{"scenario_id": "alvarez", "checkpoint_id": "initial"}
```

Explain a gap using current exact same-stage USD cost and explicit allocation.

search_repair_providers

```
{"scenario_id": "alvarez", "checkpoint_id": "update"}
```

Read trade/area matches, catalog availability, simulated interaction and quote; no contact.

Response and context contract

Successful responses contain source_mode, context_key, input_fingerprint and result. The result includes state, execution_state, items, missing facts and action candidates. The graph uses four specialist calls (insurance already includes funding), then selects up to three next actions.

Use either scenario_id/checkpoint_id or a complete typed payload. The app supplies payload when it has saved-case facts or simulated overrides; never pass both mechanisms. A scenario-only tool call uses fixture baseline data and does not read dashboard interaction overrides.

Repeat the fixture sanity check through the real MCP boundary with this repository command (it validates synthetic expectations, not live availability):

```
python -m scripts.verify_recovery_demo_data \
 --output artifacts/recovery-demo-data-verification.json
```

Safety-unknown or danger checkpoints reject routine MCP calls. A configured service failure returns a tool error; the graph shows Couldn't update with no new observation and excludes that specialist's old actions.

Synthetic data catalog

The guide is generated from the JSON fixtures and checked against the authored demo expectations. Story ordering and existing IDs are retained. Catalog selections and overrides apply only to their checkpoint.

File / count	Fields and coverage
scenarios.json / 24 stories, 72 checkpoints	Household size, adults/children, fictional location, access/pets/transport, nightly budget, contribution band, safety, accommodation, utilities, evidence, funding, trades and interactions.
housing.json / 48 sites	Four categories: hotel, church, school, official shelter. Rooms vs spaces, occupancy, capacity, activation, household togetherness, accessibility, pets, price, distance and transport.
providers.json / 60 providers	Five trades: Electrician, Contractor, Plumber, Roofer, Pool specialist. County/areas, fictional rating/review count, availability and accessible service.
checklists.json / 8 profiles	Neutral fictional requirements with explicit evidence links. No real insurer policy or approval rules.
demo_scenarios.json / 24 presenter records	Theme, presenter goal, key lesson, recommended tool, checkpoint talk track, expected four signals/execution states and primary action key.

Stable IDs

Housing: hotel: hotel-1 through hotel-12 (12); church: church-1 through church-12 (12); school: school-1 through school-12 (12); official shelter: official-shelter-1 through official-shelter-12 (12).

Providers: Electrician: electrician-1 through electrician-12 (12); Contractor: contractor-1 through contractor-12 (12); Plumber: plumber-1 through plumber-12 (12); Roofer: roofer-1 through roofer-12 (12); Pool specialist: pool-specialist-1 through pool-specialist-12 (12).

Checklists: sample-a (Sample A: Basic preparation); sample-b (Sample B: Itemized evidence); sample-c (Sample C: Incurred-cost preparation); sample-d (Sample D: Proposed-work preparation); sample-e (Sample E: Fictional temporary-stay document preparation; a neutral demo example, not an insurer requirement.); sample-f (Sample F: Fictional inspection and proposed-work document preparation; a neutral demo example, not an insurer requirement.); sample-g (Sample G: Fictional belongings and repair-progress document preparation; a neutral demo example, not an insurer requirement.); sample-h (Sample H: Fictional combined scope and incurred-cost document preparation; a neutral demo example, not an insurer requirement.).

Checkpoint catalog controls: housing_ids/provider_ids select known records; an empty list selects none. housing_overrides/provider_overrides alter allowed fields on selected records. *_age_hours and *_validity_hours control freshness. IDs and synthetic provenance cannot be overwritten.

Interactions, history and safe rehearsal

Record a simulated provider response

1. Choose Synthetic stories > Alvarez > 1 · Starting point, then Refresh checks. Expand View details · Rebuild my life.

2. Find Demo Bay Contractor (contractor-1); if the saved checkpoint already has a different interaction, use the next allowed event shown or start with a new demo-only progress database.

3. In Simulated update choose an offered event, then select Record simulated update. The app says the update was recorded and asks for Refresh checks.

4. Refresh checks. Inspect the Interaction field and next step. The supported forward chain is shortlisted > enquiry recorded > awaiting reply > quote received > quote accepted > work committed; decline is offered at awaiting reply or quote received.

5. The control changes only interaction state. It does not invent a monetary quote, send a message or complete repairs. Work committed remains distinct from repairs reported complete.

6. Switch to a different Story checkpoint. Refresh manually. Its authored interactions and separately stored overrides apply; a change at initial does not edit update or later.

Resume without deleting data

Reloading does not start checks. The latest attempt survives reload; an abandoned in-flight attempt becomes interrupted and needs Refresh checks. After an input, checkpoint or source change, earlier results are historical and current recommendations stay hidden until a successful refresh.

What changed compares the latest stored snapshot for that household context with the new one. Present initial > update > later for chronological narration. Jumping backwards is a comparison with a different authored checkpoint, not real recovery history.

After a specialist fails, Earlier successful observation - outdated is available only if a prior successful result exists for the same household context, source and checkpoint. It retains its original timestamp and never supplies a current recommendation. Campbell initial > update crosses checkpoints, so that sequence does not show the initial observation inside the failed update's details.

```
READYRELIEF_PROGRESS_DB_PATH=.local/recovery-demo-session-01.sqlite3 \
 .venv/bin/python -m streamlit run app.py
```

Choose a new, unused filename for each clean rehearsal. This changes only the preview result store. Do not remove the existing database. Saved recovery case remains a separate source, with user-reported facts and unsupported availability, exact funding and timing left unknown.

Claims to avoid

Capacity is a synthetic observation, not a reservation. Water supply does not prove drinking-water safety; an area report does not prove address restoration. Saved evidence does not prove insurer acceptance. Expected or approved payment is not received money, and received-but-unallocated money is not available stage allocation. A quote is not accepted, scheduled or completed work.

Source references: docs/RECOVERY_PROGRESS.md; ui/recovery_progress_page.py and ui/recovery_progress_components.py; recovery/progress/{fixtures,models,mcp_server,orchestrator,priorities}.py; recovery/progress/data/*.json. All scenario names and catalog labels in this guide are synthetic.

Story index and presenter cues

Choose the exact household label in Household story. The ID is the scenario_id for MCP calls. Each story has initial, update and later. H / U / I / R on the following pages means Housing / Utilities / Insurance & funding / Rebuild.

Stories 01-12	Stories 13-24
Rivera household / rivera Housing before recovery administration	Lopez household / lopez Explicit gas applicability
Chen household / chen Repairs complete while reimbursement is pending	Nguyen household / nguyen Conflicting utility observations
Alvarez household / alvarez Expected payment is not current allocation	Johnson household / johnson Observation age and refresh
Baptiste household / baptiste Accessible housing with continuing utilities	Martinez household / martinez Uninsured household funding
Morgan household / morgan Uninsured does not mean no funding question	Singh household / singh Approved, received, allocated
Williams household / williams Unconfirmed intake pauses routine checks	Robinson household / robinson Consistent currency for exact funding
Santos household / santos Eight people staying together	Lewis household / lewis Correct stage and spend once
Patel household / patel Pets, transport and a budget	Brown household / brown A larger estimate is a real setback
Okafor household / okafor Accessibility across accommodation and repairs	Wilson household / wilson Explicit evidence links
Rodriguez household / rodriguez Full capacity, available space, arranged stay	Davis household / davis Declined quote to new commitments
Thompson household / thompson Area electricity versus address evidence	Fernandez household / fernandez New danger pauses completed-work story
Garcia household / garcia Water supply versus drinking confirmation	Campbell household / campbell Partial tool failure and recovery

Expected states assume fixture baseline data with no dashboard interaction overrides. Insurance & funding is the combined card; sub-signals list preparation/funding/payment. Paused checkpoints produce no routine result or primary action. $ means USD; other currencies are labeled. Cost/allocation are authored totals; a gap requires current same-stage USD facts. Evidence counts summarize supplied records, not insurer verification.

01. Rivera household / rivera

Housing before recovery administration

4 people (2 adults, 2 children); Miami-Dade, Bay demo area. Housing budget unknown/night; accessibility no, pets yes, vehicle no. Contribution: Not sure.

Show: Start with displacement, pets and transport constraints, then move through service and funding needs.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: needed. Evidence: 2 not collected. Cost $2,000; allocation unknown. Gap unknown.	**H Red** / **U Red** **I Red** / **R Yellow** All complete. *prep Red; funds Unknown; payment Yellow*	**Confirm a suitable place to stay** Accommodation and two services are unresolved. Housing leads the next actions.
update / 2026-10-09 Stay: arranged. Evidence: 1 not collected, 1 saved. Cost $2,000; allocation unknown. Gap unknown.	**H Green** / **U Yellow** **I Red** / **R Yellow** All complete. *prep Red; funds Unknown; payment Yellow*	**Confirm electricity and essential needs** Accommodation is reported arranged, while electricity is partial and water is reported not potable.
later / 2026-10-23 Stay: arranged. Evidence: 2 saved. Cost $2,000; allocation unknown. Gap unknown.	**H Green** / **U Green** **I Unknown** / **R Yellow** I needs information; others complete. *prep Green; funds Unknown; payment Yellow*	**Confirm funds for the next repair stage** Named utilities and preparation evidence are complete in the fictional record; exact allocation remains unknown.

Lesson: Possible housing matches do not establish an arrangement; saved preparation is separate from exact stage funding. | MCP: find_temporary_housing

02. Chen household / chen

Repairs complete while reimbursement is pending

2 people (2 adults, 0 children); Miami-Dade, Bay demo area. Housing budget $150/night; accessibility no, pets no, vehicle yes. Contribution: $2,000-$4,999.

Show: Show paid repair costs, remaining preparation, and a reimbursement follow-up after reported completion.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: home. Evidence: 3 not collected. Cost $3,000; allocation $3,000. Spent $1,000. Gap $0.00. Expected $3,000.	**H Green** / **U Green** **I Red** / **R Yellow** All complete. *prep Red; funds Green; payment Yellow*	**Review missing preparation information** The household reports being home and exact funding covers the stage; missing evidence leads.
update / 2026-10-09 Stay: home. Evidence: 2 not collected, 1 saved. Cost $3,000; allocation $3,000. Spent $2,500. Gap $0.00. Expected $3,000.	**H Green** / **U Yellow** **I Red** / **R Yellow** All complete. *prep Red; funds Green; payment Yellow*	**Confirm water and essential needs** Water confirmation is now unresolved and takes priority over preparation.
later / 2026-10-23 Stay: home. Evidence: 3 saved. Cost $3,000; allocation $3,000. Spent $3,000. Gap $0.00. Expected $3,000.	**H Green** / **U Green** **I Yellow** / **R Green** All complete. *prep Green; funds Green; payment Yellow*	**Review pending insurance reimbursement** Repairs and preparation are reported complete, but no received payment is recorded; reimbursement follow-up remains.

Lesson: Repair completion, evidence readiness and payment receipt are separate facts. | MCP: assess_insurance_readiness

03. Alvarez household / alvarez

Expected payment is not current allocation

5 people (2 adults, 3 children); Miami-Dade, Bay demo area. Housing budget $150/night; accessibility no, pets no, vehicle yes. Contribution: Under $500.

Show: Compare a large expected payment with a small explicit allocation and then a later allocation.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: arranged. Evidence: 3 not collected. Cost $7,000; allocation $500. Gap $6500.00. Expected $6,000.	**H Green** / **U Green** **I Red** / **R Yellow** All complete. *prep Red; funds Red; payment Yellow*	**Confirm funds for the next repair stage** Accommodation and named utilities are met; the explicit stage funding gap leads.
update / 2026-10-09 Stay: arranged. Evidence: 2 not collected, 1 saved. Cost $7,000; allocation $500. Gap $6500.00. Expected $6,000. Approved $6,000.	**H Green** / **U Unknown** **I Red** / **R Yellow** U needs information; others complete. *prep Red; funds Red; payment Yellow*	**Confirm electricity and essential needs** Stale utility observations interrupt the funding story and require fresh address reports.
later / 2026-10-23 Stay: arranged. Evidence: 3 saved. Cost $7,000; allocation $7,000. Gap $0.00. Expected $6,000. Approved $6,000. Received $6,500.	**H Green** / **U Green** **I Green** / **R Yellow** All complete. *prep Green; funds Green; payment Green*	**Review a fictional repair provider** The fictional record now has received and allocated funds. The expanded catalog still offers uncommitted contractor and roofer candidates; deterministic ordering puts contractor-12 first, while roof arrangements remain incomplete.

Lesson: Expected or approved payment cannot be added to funds currently allocated to a stage. | MCP: assess_funding_gap

04. Baptiste household / baptiste

Accessible housing with continuing utilities

3 people (2 adults, 1 child); Miami-Dade, Bay demo area. Housing budget $150/night; accessibility yes, pets no, vehicle yes. Contribution: $2,000-$4,999.

Show: Show that accommodation can be arranged while water and gas needs remain.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: needed. Evidence: 3 not collected. Cost $2,000; allocation unknown. Gap unknown.	**H Red** / **U Red** **I Red** / **R Yellow** All complete. *prep Red; funds Unknown; payment Yellow*	**Confirm a suitable place to stay** Accessible accommodation is needed, with water and gas interruptions reported.
update / 2026-10-09 Stay: arranged. Evidence: 2 not collected, 1 saved. Cost $2,000; allocation unknown. Gap unknown.	**H Green** / **U Yellow** **I Red** / **R Yellow** All complete. *prep Red; funds Unknown; payment Yellow*	**Confirm water and essential needs** Accommodation is arranged but water drinking confirmation remains unresolved.
later / 2026-10-23 Stay: home. Evidence: 3 saved. Cost $2,000; allocation unknown. Gap unknown.	**H Green** / **U Green** **I Unknown** / **R Green** I needs information; others complete. *prep Green; funds Unknown; payment Yellow*	**Review pending insurance reimbursement** Repairs are reported complete, while payment remains pending and exact stage funding is unknown.

Lesson: Accessibility fit is one constraint, and reported repair completion does not confirm payment receipt. | MCP: find_temporary_housing

05. Morgan household / morgan

Uninsured does not mean no funding question

1 person (1 adult, 0 children); Miami-Dade, Bay demo area. Housing budget $150/night; accessibility no, pets no, vehicle yes. Contribution: Under $500.

Show: Follow an uninsured household from displacement to reported completion without inventing insurance activity.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: needed. Evidence: none linked. Cost unknown; allocation unknown. Gap unknown.	**H Red** / **U Red** **I Unknown** / **R Yellow** I needs information; others complete. *prep Not Applicable; funds Unknown; payment Not Applicable*	**Confirm a suitable place to stay** Housing and essential services lead; insurance preparation and payment are not applicable.
update / 2026-10-09 Stay: arranged. Evidence: none linked. Cost unknown; allocation unknown. Gap unknown.	**H Green** / **U Yellow** **I Unknown** / **R Yellow** I needs information; others complete. *prep Not Applicable; funds Unknown; payment Not Applicable*	**Confirm water and essential needs** Accommodation is arranged; water confirmation and exact repair allocation remain unresolved.
later / 2026-10-23 Stay: home. Evidence: none linked. Cost unknown; allocation unknown. Gap unknown.	**H Green** / **U Green** **I Unknown** / **R Green** I needs information; others complete. *prep Not Applicable; funds Unknown; payment Not Applicable*	**No next action** Home return and repairs are reported complete. The historical funding gap is still unknown, and no new routine action is generated.

Lesson: Insurance preparation and payments may be not applicable while household funding remains unknown. | MCP: assess_funding_gap

06. Williams household / williams

Unconfirmed intake pauses routine checks

Household size unconfirmed; Miami-Dade, Bay demo area. Housing budget unknown/night; accessibility unknown, pets unknown, vehicle unknown. Contribution: Not sure.

Show: Show that missing danger assessment prevents routine tool execution.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: unknown. Evidence: none linked. Cost unknown; allocation unknown.	**H Paused** / **U Paused** **I Paused** / **R Paused** Paused: no routine check or primary action is produced.	**Routine checks paused** Immediate danger has not been assessed. The routine preview remains paused; confirm safety before checking.
update / 2026-10-09 Stay: unknown. Evidence: none linked. Cost unknown; allocation unknown.	**H Paused** / **U Paused** **I Paused** / **R Paused** Paused: no routine check or primary action is produced.	**Routine checks paused** Safety is still unassessed. The authored rebuild-failure flag is not exercised because the safety gate comes first.
later / 2026-10-23 Stay: unknown. Evidence: none linked. Cost unknown; allocation unknown.	**H Paused** / **U Paused** **I Paused** / **R Paused** Paused: no routine check or primary action is produced.	**Routine checks paused** No new household or safety facts are supplied. Routine checks remain paused, without fresh signals or actions.

Lesson: Unknown safety is not a successful recovery check; do not run the ordinary specialists at any checkpoint. | MCP: find_temporary_housing

07. Santos household / santos

Eight people staying together

8 people (3 adults, 5 children); Miami-Dade, Bay demo area. Housing budget $100/night; accessibility no, pets no, vehicle yes. Contribution: Not sure.

Show: Compare two hotel rooms with eight person-spaces and a household-together requirement.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: needed. Evidence: 3 saved. Cost $2,000; allocation $500. Gap $1500.00. Received $2,000.	**H Red** / **U Green** **I Red** / **R Yellow** All complete. *prep Green; funds Red; payment Green*	**Confirm a suitable place to stay** One family room or seven person-spaces cannot fit eight people; a site that splits the household is excluded.
update / 2026-10-09 Stay: needed. Evidence: 3 saved. Cost $2,000; allocation $500. Gap $1500.00. Received $2,000.	**H Red** / **U Green** **I Red** / **R Yellow** All complete. *prep Green; funds Red; payment Green*	**Confirm a suitable place to stay** Two rooms at four people each or enough person-spaces now fit. Accommodation is still explicitly needed.
later / 2026-10-23 Stay: arranged. Evidence: 3 saved. Cost $2,000; allocation $500. Gap $1500.00. Received $2,000.	**H Green** / **U Green** **I Red** / **R Yellow** All complete. *prep Green; funds Red; payment Green*	**Confirm funds for the next repair stage** A separate fictional report says accommodation is arranged. The remaining stage funding gap becomes the next action.

Lesson: Capacity is counted in the site's units, and a suitable candidate does not reserve accommodation. | MCP: find_temporary_housing

08. Patel household / patel

Pets, transport and a budget

3 people (2 adults, 1 child); Miami-Dade, Bay demo area. Housing budget $60/night; accessibility no, pets yes, vehicle no. Contribution: Not sure.

Show: Show why separate pet, transport and cost filters must all be satisfied.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: needed. Evidence: 3 saved. Cost $2,000; allocation $500. Gap $1500.00. Received $2,000.	**H Red** / **U Green** **I Red** / **R Yellow** All complete. *prep Green; funds Red; payment Green*	**Confirm a suitable place to stay** The pet-excluding hotel, no-transport hotel and two-room cost above USD 60 are all excluded.
update / 2026-10-09 Stay: needed. Evidence: 3 saved. Cost $2,000; allocation $500. Gap $1500.00. Received $2,000.	**H Red** / **U Green** **I Red** / **R Yellow** All complete. *prep Green; funds Red; payment Green*	**Confirm a suitable place to stay** The selected hotel and community hall support pets and transport within the declared nightly budget, but no arrangement is reported.
later / 2026-10-23 Stay: arranged. Evidence: 3 saved. Cost $2,000; allocation $500. Gap $1500.00. Received $2,000.	**H Green** / **U Green** **I Red** / **R Yellow** All complete. *prep Green; funds Red; payment Green*	**Confirm funds for the next repair stage** Accommodation is reported arranged; the household still needs to close a stage funding gap.

Lesson: A cheap option can still fail transport or pet requirements, and a fit does not imply a booking. | MCP: find_temporary_housing

09. Okafor household / okafor

Accessibility across accommodation and repairs

2 people (2 adults, 0 children); Miami-Dade, Bay demo area. Housing budget $120/night; accessibility yes, pets no, vehicle yes. Contribution: Not sure.

Show: Distinguish explicitly inaccessible options from unknown accessibility and supported alternatives.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: needed. Evidence: 4 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Red** / **U Green** **I Green** / **R Unknown** R needs information; others complete. *prep Green; funds Green; payment Green*	**Confirm a suitable place to stay** The inaccessible hotel and contractor are excluded. Remaining candidates have unknown capacity or accessibility.
update / 2026-10-09 Stay: needed. Evidence: 4 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Red** / **U Green** **I Green** / **R Yellow** All complete. *prep Green; funds Green; payment Green*	**Confirm a suitable place to stay** Current accessible accommodation candidates and an accessible provider are supplied, but accommodation is still needed.
later / 2026-10-23 Stay: arranged. Evidence: 4 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Green** **I Green** / **R Yellow** All complete. *prep Green; funds Green; payment Green*	**Review a fictional repair provider** Accommodation is reported arranged. Review the accessible fictional contractor; listed availability is not a work commitment.

Lesson: Unknown accessibility needs confirmation; provider accessibility is assessed independently of housing. | MCP: find_temporary_housing

10. Rodriguez household / rodriguez

Full capacity, available space, arranged stay

4 people (2 adults, 2 children); Miami-Dade, Bay demo area. Housing budget $120/night; accessibility no, pets no, vehicle yes. Contribution: Not sure.

Show: Show three distinct accommodation facts rather than treating vacancy as a reservation.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: needed. Evidence: 3 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Red** / **U Green** **I Green** / **R Green** All complete. *prep Green; funds Green; payment Green*	**Confirm a suitable place to stay** All three selected sites have zero available spaces, so there are no matches.
update / 2026-10-09 Stay: needed. Evidence: 3 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Red** / **U Green** **I Green** / **R Green** All complete. *prep Green; funds Green; payment Green*	**Confirm a suitable place to stay** One fictional shelter now reports six spaces for a four-person household; housing remains needed.
later / 2026-10-23 Stay: arranged. Evidence: 3 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Green** **I Green** / **R Green** All complete. *prep Green; funds Green; payment Green*	**No next action** The household separately reports an arrangement. The authored checks generate no further routine action; this is not a home-safety clearance.

Lesson: A capacity update can create an option while the housing signal remains red until arrangement is reported. | MCP: find_temporary_housing

11. Thompson household / thompson

Area electricity versus address evidence

3 people (2 adults, 1 child); Miami-Dade, Bay demo area. Housing budget $120/night; accessibility no, pets no, vehicle yes. Contribution: Not sure.

Show: Move from area news to a partial address report and then reported availability.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: arranged. Evidence: 2 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Unknown** **I Green** / **R Green** U needs information; others complete. *prep Green; funds Green; payment Green*	**Confirm electricity and essential needs** A fresh area report says electricity is available, but the household address is unconfirmed.
update / 2026-10-09 Stay: arranged. Evidence: 2 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Yellow** **I Green** / **R Green** All complete. *prep Green; funds Green; payment Green*	**Confirm electricity and essential needs** A fresh fictional address report establishes only partial electricity service.
later / 2026-10-23 Stay: arranged. Evidence: 2 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Green** **I Green** / **R Green** All complete. *prep Green; funds Green; payment Green*	**No next action** The fictional address report now says available. It makes no claim about overall home safety.

Lesson: Area information cannot establish household service restoration. | MCP: check_utility_health

12. Garcia household / garcia

Water supply versus drinking confirmation

3 people (2 adults, 1 child); Miami-Dade, Bay demo area. Housing budget $120/night; accessibility no, pets no, vehicle yes. Contribution: Not sure.

Show: Explain why running water can remain yellow until explicit potability is reported.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: arranged. Evidence: 2 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Red** **I Green** / **R Green** All complete. *prep Green; funds Green; payment Green*	**Confirm water and essential needs** Water supply is interrupted; the water action leads.
update / 2026-10-09 Stay: arranged. Evidence: 2 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Yellow** **I Green** / **R Green** All complete. *prep Green; funds Green; payment Green*	**Confirm water and essential needs** Water is available, but potability is not confirmed, so the service remains yellow.
later / 2026-10-23 Stay: arranged. Evidence: 2 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Green** **I Green** / **R Green** All complete. *prep Green; funds Green; payment Green*	**No next action** The new fictional address report explicitly says potable. This is a synthetic report, not drinking-water advice or verification.

Lesson: Water supply, potability and home safety are different facts. | MCP: check_utility_health

13. Lopez household / lopez

Explicit gas applicability

3 people (2 adults, 1 child); Miami-Dade, Bay demo area. Housing budget $120/night; accessibility no, pets no, vehicle yes. Contribution: Not sure.

Show: Show that an area gas outage cannot establish whether this household uses gas.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: arranged. Evidence: 2 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Unknown** **I Green** / **R Green** U needs information; others complete. *prep Green; funds Green; payment Green*	**Confirm gas and essential needs** Gas use and service are unknown, so an address-level confirmation action remains.
update / 2026-10-09 Stay: arranged. Evidence: 2 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Unknown** **I Green** / **R Green** U needs information; others complete. *prep Green; funds Green; payment Green*	**Confirm gas and essential needs** The area outage report does not establish household gas use or address service. The gas item stays unknown.
later / 2026-10-23 Stay: arranged. Evidence: 2 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Green** **I Green** / **R Green** All complete. *prep Green; funds Green; payment Green*	**No next action** The household explicitly reports no gas use. Gas is not applicable, while electricity and water remain green.

Lesson: Gas becomes not applicable only after an explicit household report; no observation is not the same as no gas. | MCP: check_utility_health

14. Nguyen household / nguyen

Conflicting utility observations

3 people (2 adults, 1 child); Miami-Dade, Bay demo area. Housing budget $120/night; accessibility no, pets no, vehicle yes. Contribution: Not sure.

Show: Resolve electricity conflict first while preserving the separate water-potability conflict.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: arranged. Evidence: 2 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Unknown** **I Green** / **R Green** U needs information; others complete. *prep Green; funds Green; payment Green*	**Confirm electricity and essential needs** Fresh address reports conflict on electricity status and water potability; electricity sorts first among unresolved utilities.
update / 2026-10-09 Stay: arranged. Evidence: 2 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Unknown** **I Green** / **R Green** U needs information; others complete. *prep Green; funds Green; payment Green*	**Confirm water and essential needs** Electricity reports now agree, but water potability still conflicts, so water becomes the lead action.
later / 2026-10-23 Stay: arranged. Evidence: 2 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Green** **I Green** / **R Green** All complete. *prep Green; funds Green; payment Green*	**No next action** The new checkpoint supplies consistent current address observations for each service.

Lesson: Conflicting current reports stay unknown until the contradictory observation is resolved in a new checkpoint. | MCP: check_utility_health

15. Johnson household / johnson

Observation age and refresh

3 people (2 adults, 1 child); Miami-Dade, Bay demo area. Housing budget $120/night; accessibility no, pets no, vehicle yes. Contribution: Not sure.

Show: Compare stale housing and provider observations with a fresh authored update.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: needed. Evidence: 4 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Red** / **U Green** **I Green** / **R Unknown** R needs information; others complete. *prep Green; funds Green; payment Green*	**Confirm a suitable place to stay** The selected catalogs are 72 hours old with 24-hour validity. Housing candidates and provider observations are unknown.
update / 2026-10-09 Stay: needed. Evidence: 4 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Red** / **U Green** **I Green** / **R Yellow** All complete. *prep Green; funds Green; payment Green*	**Confirm a suitable place to stay** Both catalogs are refreshed. Accommodation is still needed and one fictional roofer is waiting.
later / 2026-10-23 Stay: arranged. Evidence: 4 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Green** **I Green** / **R Yellow** All complete. *prep Green; funds Green; payment Green*	**Review the simulated quote** Accommodation is reported arranged; a contractor quote and a roofer awaiting reply remain distinct from work commitments.

Lesson: Stale candidate observations are not fresh availability, and refreshed availability still does not reserve a stay or work. | MCP: search_repair_providers

16. Martinez household / martinez

Uninsured household funding

3 people (2 adults, 1 child); Miami-Dade, Bay demo area. Housing budget $120/night; accessibility no, pets no, vehicle yes. Contribution: Not sure.

Show: Track a concrete stage gap without an insurance preparation or payment track.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: arranged. Evidence: none linked. Cost $3,500; allocation $500. Gap $3000.00.	**H Green** / **U Green** **I Red** / **R Yellow** All complete. *prep Not Applicable; funds Red; payment Not Applicable*	**Confirm funds for the next repair stage** The USD 3,500 stage has USD 500 explicitly allocated: a USD 3,000 gap. Insurance preparation and payment are not applicable.
update / 2026-10-09 Stay: arranged. Evidence: none linked. Cost $3,500; allocation $1,500. Gap $2000.00.	**H Green** / **U Green** **I Red** / **R Yellow** All complete. *prep Not Applicable; funds Red; payment Not Applicable*	**Confirm funds for the next repair stage** The allocation rises to USD 1,500, leaving a USD 2,000 gap even though a quote is received.
later / 2026-10-23 Stay: arranged. Evidence: none linked. Cost $3,500; allocation $3,500. Gap $0.00.	**H Green** / **U Green** **I Green** / **R Yellow** All complete. *prep Not Applicable; funds Green; payment Not Applicable*	**Follow up on the simulated provider response** The explicit allocation covers USD 3,500. The accepted fictional quote still needs a work commitment.

Lesson: No insurance does not remove the need for an explicit current allocation. | MCP: assess_funding_gap

17. Singh household / singh

Approved, received, allocated

3 people (2 adults, 1 child); Miami-Dade, Bay demo area. Housing budget $120/night; accessibility no, pets no, vehicle yes. Contribution: Not sure.

Show: Display payment receipt independently from available repair-stage allocation.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: arranged. Evidence: 4 saved. Cost $5,000; allocation $1,000. Gap $4000.00. Approved $4,000.	**H Green** / **U Green** **I Red** / **R Yellow** All complete. *prep Green; funds Red; payment Yellow*	**Confirm funds for the next repair stage** A fictional USD 4,000 payment is approved but not received. Only USD 1,000 is allocated to a USD 5,000 stage.
update / 2026-10-09 Stay: arranged. Evidence: 4 saved. Cost $5,000; allocation $1,000. Gap $4000.00. Approved $4,000. Received $4,000.	**H Green** / **U Green** **I Red** / **R Yellow** All complete. *prep Green; funds Red; payment Green*	**Confirm funds for the next repair stage** The payment is recorded received, yet the allocation remains USD 1,000 and the USD 4,000 gap remains.
later / 2026-10-23 Stay: arranged. Evidence: 4 saved. Cost $5,000; allocation $5,000. Gap $0.00. Approved $4,000. Received $4,000.	**H Green** / **U Green** **I Green** / **R Yellow** All complete. *prep Green; funds Green; payment Green*	**Review the simulated quote** USD 5,000 is now explicitly allocated. The received payment is not counted again; the quote still needs follow-up.

Lesson: A received payment is not added to stage funds until explicitly allocated. | MCP: assess_funding_gap

18. Robinson household / robinson

Consistent currency for exact funding

3 people (2 adults, 1 child); Miami-Dade, Bay demo area. Housing budget $120/night; accessibility no, pets no, vehicle yes. Contribution: Not sure.

Show: Demonstrate that mismatched currency in allocation or spend prevents an exact USD answer.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: arranged. Evidence: 4 saved. Cost $3,000; allocation EUR 3,000. Gap unknown. Received $2,000.	**H Green** / **U Green** **I Unknown** / **R Yellow** I needs information; others complete. *prep Green; funds Unknown; payment Green*	**Confirm funds for the next repair stage** The stage cost is USD 3,000, but the allocation is EUR 3,000. Exact stage funding is unknown.
update / 2026-10-09 Stay: arranged. Evidence: 4 saved. Cost $3,000; allocation $3,000. Spent EUR 500. Gap unknown. Received $2,000.	**H Green** / **U Green** **I Unknown** / **R Yellow** I needs information; others complete. *prep Green; funds Unknown; payment Green*	**Confirm funds for the next repair stage** Cost and allocation are USD, but the spend record remains EUR 500, so the answer is still unknown.
later / 2026-10-23 Stay: arranged. Evidence: 4 saved. Cost $3,000; allocation $3,000. Spent $500. Gap $0.00. Received $2,000.	**H Green** / **U Green** **I Green** / **R Yellow** All complete. *prep Green; funds Green; payment Green*	**Review the simulated quote** All three records now use USD. After USD 500 spend, USD 2,500 cost and allocation remain, with no exact gap.

Lesson: The demo does not infer exchange rates or silently convert currency. | MCP: assess_funding_gap

19. Lewis household / lewis

Correct stage and spend once

3 people (2 adults, 1 child); Miami-Dade, Bay demo area. Housing budget $120/night; accessibility no, pets no, vehicle yes. Contribution: Not sure.

Show: Show an allocation to the wrong stage, then correct it and record partial spending.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: arranged. Evidence: 4 saved. Cost $3,000; allocation $3,000. Gap unknown. Received $2,000.	**H Green** / **U Green** **I Unknown** / **R Yellow** I needs information; others complete. *prep Green; funds Unknown; payment Green*	**Confirm funds for the next repair stage** The USD 3,000 allocation belongs to roof-stabilization, while the current stage is essential-repairs, so funding is unknown.
update / 2026-10-09 Stay: arranged. Evidence: 4 saved. Cost $3,000; allocation $3,000. Gap $0.00. Received $2,000.	**H Green** / **U Green** **I Green** / **R Yellow** All complete. *prep Green; funds Green; payment Green*	**Review the simulated quote** The explicit allocation is corrected to the current stage; the fictional quote is still awaiting commitment.
later / 2026-10-23 Stay: arranged. Evidence: 4 saved. Cost $3,000; allocation $3,000. Spent $1,200. Gap $0.00. Received $2,000.	**H Green** / **U Green** **I Green** / **R Green** All complete. *prep Green; funds Green; payment Green*	**No next action** USD 1,200 spending leaves USD 1,800 cost and USD 1,800 allocation. Work is committed in the simulation, not marked complete.

Lesson: Stage IDs must match, and spending reduces both remaining cost and allocation once. | MCP: assess_funding_gap

20. Brown household / brown

A larger estimate is a real setback

3 people (2 adults, 1 child); Miami-Dade, Bay demo area. Housing budget $120/night; accessibility no, pets no, vehicle yes. Contribution: Not sure.

Show: Keep completed cleanup visible while a roof-stage cost increase creates a renewed funding gap.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: arranged. Evidence: 4 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Green** **I Green** / **R Yellow** All complete. *prep Green; funds Green; payment Green*	**Review the simulated quote** USD 2,000 allocation covers the original roof-stage estimate. Completed cleanup remains recorded.
update / 2026-10-09 Stay: arranged. Evidence: 4 saved. Cost $5,500; allocation $2,000. Gap $3500.00. Received $2,000.	**H Green** / **U Green** **I Red** / **R Yellow** All complete. *prep Green; funds Red; payment Green*	**Confirm funds for the next repair stage** The estimate rises to USD 5,500 while allocation stays USD 2,000. The USD 3,500 gap takes priority.
later / 2026-10-23 Stay: arranged. Evidence: 4 saved. Cost $5,500; allocation $2,500. Spent $1,000. Gap $3000.00. Received $2,000.	**H Green** / **U Green** **I Red** / **R Yellow** All complete. *prep Green; funds Red; payment Green*	**Confirm funds for the next repair stage** An allocation of USD 2,500 and spend of USD 1,000 still leave a USD 3,000 gap. The story intentionally ends unresolved.

Lesson: New information can worsen a signal without reopening completed historical work. | MCP: assess_funding_gap

21. Wilson household / wilson

Explicit evidence links

3 people (2 adults, 1 child); Miami-Dade, Bay demo area. Housing budget $120/night; accessibility no, pets no, vehicle yes. Contribution: Not sure.

Show: Follow a saved but unlinked photo, a linked reported-available record, and finally linked saved evidence.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: arranged. Evidence: 4 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Green** **I Red** / **R Green** All complete. *prep Red; funds Green; payment Green*	**Review missing preparation information** The photo record is saved but has no requirement link. The selected fictional photo requirement remains red.
update / 2026-10-09 Stay: arranged. Evidence: 1 reported available, 3 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Green** **I Yellow** / **R Green** All complete. *prep Yellow; funds Green; payment Green*	**Review missing preparation information** The photo requirement is linked to reported-available evidence, which is yellow rather than saved.
later / 2026-10-23 Stay: arranged. Evidence: 4 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Green** **I Green** / **R Green** All complete. *prep Green; funds Green; payment Green*	**No next action** The linked photo evidence is now saved. Preparation is green without asserting insurer acceptance or coverage.

Lesson: A saved file alone is not checklist evidence; requirement links and evidence status both matter. | MCP: assess_insurance_readiness

22. Davis household / davis

Declined quote to new commitments

3 people (2 adults, 1 child); Miami-Dade, Bay demo area. Housing budget $120/night; accessibility no, pets no, vehicle yes. Contribution: Not sure.

Show: Retain a declined provider while comparing new quotes for two needed trades.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: arranged. Evidence: 3 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Green** **I Green** / **R Yellow** All complete. *prep Green; funds Green; payment Green*	**Follow up on the simulated provider response** The old contractor is declined and excluded from actions. New contractor and roofer responses are still awaited.
update / 2026-10-09 Stay: arranged. Evidence: 3 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Green** **I Green** / **R Yellow** All complete. *prep Green; funds Green; payment Green*	**Review the simulated quote** Both new providers supply fictional quotes. Neither quote is accepted or committed merely by appearing.
later / 2026-10-23 Stay: arranged. Evidence: 3 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Green** **I Green** / **R Green** All complete. *prep Green; funds Green; payment Green*	**No next action** Both needed trades have fictional work commitments. Repairs remain explicitly incomplete.

Lesson: Declined providers, received quotes and work commitments are separate states; none proves completed work. | MCP: search_repair_providers

23. Fernandez household / fernandez

New danger pauses completed-work story

3 people (2 adults, 1 child); Miami-Dade, Bay demo area. Housing budget $120/night; accessibility no, pets no, vehicle yes. Contribution: Not sure.

Show: Demonstrate the safety gate after a previously successful checkpoint, then resume only at a newly assessed checkpoint.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: home. Evidence: 3 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Green** **I Green** / **R Green** All complete. *prep Green; funds Green; payment Green*	**No next action** Original repairs and home return are reported complete in the fictional record; no new routine action is generated.
update / 2026-10-09 Stay: needed. Evidence: 3 saved. Cost $2,000; allocation $2,000. Received $2,000.	**H Paused** / **U Paused** **I Paused** / **R Paused** Paused: no routine check or primary action is produced.	**Routine checks paused** New immediate danger is true. Do not run ordinary tools or show fresh specialist results; routine actions are absent.
later / 2026-10-23 Stay: arranged. Evidence: 3 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Yellow** **I Green** / **R Green** All complete. *prep Green; funds Green; payment Green*	**Confirm electricity and essential needs** A new fictional checkpoint explicitly assesses immediate danger as false. Accommodation is arranged, electricity remains partial, and the completed original repair history stays complete.

Lesson: Completed repair history survives new danger; a later false danger flag is an authored assessment, not a safety clearance. | MCP: check_utility_health

24. Campbell household / campbell

Partial tool failure and recovery

3 people (2 adults, 1 child); Miami-Dade, Bay demo area. Housing budget $120/night; accessibility no, pets no, vehicle yes. Contribution: Not sure.

Show: Contrast a successful check, a failed utility tool and a fresh retry while provider work remains pending.

Checkpoint / key facts	Four signals	Primary action / presenter cue
initial / 2026-10-02 Stay: arranged. Evidence: 3 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Yellow** **I Green** / **R Yellow** All complete. *prep Green; funds Green; payment Green*	**Confirm water and essential needs** Water potability is unconfirmed and leads; the pool-specialist quote remains pending.
update / 2026-10-09 Stay: arranged. Evidence: 3 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Unknown** **I Green** / **R Yellow** U failed; others complete. *prep Green; funds Green; payment Green*	**Review the simulated quote** The utility tool is deliberately unavailable. Its current signal is unknown and execution failed; the provider action must disclose the partial check.
later / 2026-10-23 Stay: arranged. Evidence: 3 saved. Cost $2,000; allocation $2,000. Gap $0.00. Received $2,000.	**H Green** / **U Green** **I Green** / **R Yellow** All complete. *prep Green; funds Green; payment Green*	**Review the simulated quote** The utility tool succeeds with a fresh fictional potable-water report. The unresolved provider quote remains the next action.

Lesson: Failed tools yield unknown current signals and no stale actions; remaining recommendations disclose partial information. | MCP: check_utility_health
